AIA VOICE INSIGHTS

EXCO PRE-READ · ONE-SLIDE VIEW

Agents spend the meeting listening and the evening typing.
Let's give them the evening back.

Whether on paper or keyed into i-PoS, today's records are typed from memory, late and uneven. **Voice Insights is a next-generation system:** it turns the conversation itself into insight and ready-to-review paperwork, in four languages.

FROM CONVERSATION TO READY-TO-REVIEW

~30 seconds

Meet Juno
Your agent's debrief partner.
Just say **"Hey Juno."**

Suggestion + reasons · Fact-find · Record of advice · Follow-up · CRM note

SLIDE 1 For our agents

"Evenings back, better conversations."

- **Time back to sell and serve**
  Drafts of every record to check, not re-type from memory
- **Better conversations in the room**
  A live picture of family, hopes and worries, plus the next best question
- **Fewer missed needs**
  Gaps listed at once, so the next meeting starts sharper
- **Safer, more confident advice**
  Risky promises flagged as they are made
- **Every customer, in their own language**
  English · 中文 · Bahasa Melayu · தமிழ்

SLIDE 2 For AIA Singapore

"Consistent, visible, compliant, at well under a dollar a conversation."

- **Productivity at scale**
  Hours returned across the whole agency force
- **Compliance caught early**
  Not weeks later in a file review
- **Leadership visibility**
  Volume, needs, mood, risk and speed in one view
- **Consistent quality**
  One standard, whichever agent a customer meets
- **Revenue upside**
  Faster follow-up, fewer missed needs
- **Brand and customer trust**
  A fuller record, faster multilingual service

The bigger prize is beyond time saved: one avoided conduct incident, or a small lift in conversion, can outweigh a year of hours returned.

WHY NOW · SINGAPORE MARKET SIGNALS

Advice is where growth is, and an agent's time is the scarce asset.

S$6.53B
2025 weighted new-business premiums, up 11.3% on 2024: a growing market to serve well

+35.9%
Adviser-channel premiums, H1 2026. Advisers retake the lead at 37.3% share

74%
Critical-illness protection gap (mortality 21%): S$952B of cover still missing, which better conversations can help close

≈74,000 hrs
a month if each of the **12,389** tied reps regained **6 hours**: about **460 full-time equivalents**. *Illustration; AIA's own baseline comes first.*
