

MEET JUNO

Every conversation, understood.

AIA Voice Insights: listen, understand, draft, advise. The advisor stays in charge.

THE PROBLEM

Great advice gets lost in admin

Hours lost after every meeting
Notes, fact-finds and records typed by hand

Slow, uneven follow-up
Customers wait, and language needs are served unevenly

Risk found late
A risky promise surfaces in a file review, weeks on

No view for leaders
No live picture of volume, quality or needs

THE COST

Time, trust and risk

Admin crowds out selling, and quality depends on one person's memory.

CAPTURE

Three ways to capture a conversation

After the meeting
Dictate a summary; it is structured and checked for gaps

With the customer
Live listening, mood, needs and the next best question

Debrief with Juno
Dictate, then Juno checks the gaps and reads back

Four languages
English, Mandarin, Malay, Tamil, and mixed speech

BUSINESS IMPACT

No re-typing

Agents capture once, and every customer is served in the language they prefer.

DEBRIEF WITH JUNO

Nothing is lost before the analysis

Dictate freely
Juno listens and never interrupts a pause

Up to five short questions
Only about what is missing or unclear

Live fact-find meter
26 fields counted as the advisor answers

Compliance catch
A promise or guarantee is raised before it is filed

BUSINESS IMPACT

Fewer missed needs

A more complete fact-find, and safer advice, from the first debrief.

LIVE WITH THE CUSTOMER

A coach in the conversation

Needs, mood and buying signals
A live picture of the customer as they speak

Family map
Dependants, goals and concerns, in the customer's words

Next best question
Suggested while the meeting is still going

Risky statements flagged
Caught as they are said, not weeks later

BUSINESS IMPACT

Better conversations

Stronger discovery and compliance caught in the moment.

THE AGENT TEAM

Eleven agents, one grounded suggestion

30 to 40 seconds
From conversation to a full suggestion

Grounded in product documents
Reasons, concerns and citations you can check

Compliance check built in
Every proposal is screened before it is shown

A person starts it
Only the advisor's own click starts the analysis

BUSINESS IMPACT

Consistent, explainable

The same quality of suggestion for every advisor, in seconds.

ADVICE PACK

The paperwork is drafted for you

Fact-find and record of advice
Filled from the conversation, gaps marked

Follow-up message
A WhatsApp draft in the customer's language

CRM note and next meeting
Tasks and an agenda, ready to use

Advisory report and proposal
An internal briefing and a customer-friendly page

BUSINESS IMPACT

Evenings back

Advisors review drafts instead of re-typing, and nothing is sent without them.

TALK TO JUNO

Ask why, and ask what if

Why was a product picked?
Answers from this customer's file and the documents

What if something changes?
One more child: dependants 3 to 4, run again in seconds

Sums done by code
Exact figures with the working shown, never guessed

Speak or type
The discussion is saved with the suggestion

BUSINESS IMPACT

Defend every suggestion

Advisors can explain the reasoning to the customer, and test changes live.

HEY JUNO

Hands-free across the whole app

Say “Hey Juno”
Open any screen or press any button by voice

Brief me, or read the report
A 90-second briefing or the full report, read aloud

Stop, pause, next
Interrupt any reading in your own words

Asks before it changes anything
Saving, sending or removing needs a clear yes

BUSINESS IMPACT

Use it anywhere

Between meetings or with busy hands, and a gain for accessibility.

DRESS REHEARSAL

Practise the meeting before it happens

Juno briefs you
In under a minute, on the customer and the goal

Juno plays the customer
Built from your own debrief, spoken aloud

Coach's notes
What landed, what you missed, promises to reword

Training only
Nothing is saved or sent to the real customer

BUSINESS IMPACT

Skill and confidence

Coaching at scale, without taking a manager's time.

BUILT FOR TRUST

Safe by design, human in control

Private by default
ID and card numbers are never stored or shown

Weak speech filtered out
Noise and made-up words are discarded

Juno suggests, you decide
No prices quoted, nothing sent, no auto-approval

Mixed-language accuracy
Words stay in the language they were spoken in

BUSINESS IMPACT

Safe to scale

The control and audit trail that compliance and leaders expect.

WHAT IT MEANS FOR THE BUSINESS

Value for everyone in the chain

Advisors

Time back to sell; review drafts, don't re-type

Customers

Faster follow-up in their own language

Compliance

Risk caught in the moment, not weeks later

Leadership

One view of volume, quality and needs

WHY NOW

The opportunity is on the table

+36%

Adviser premiums are up (LIA 2025 and H1 2026 results)

74%

of critical illness cover is still missing (protection gap)

74,000

hours a month back: six hours per rep, an illustration to prove with AIA's own numbers

Sources: LIA 2025 and H1 2026 results; LIA 2022 protection gap study. The 74,000 hours figure is an illustration, to be proven with AIA's own numbers.

LET'S PROVE IT TOGETHER

Just say, “Hey Juno.”
